ALLERGEN POLICY

Object: statement of allergen policy

This is a written statement how we organize at IMCO Premium Foods Ltd. our policy with allergens. We are trading with food ingredients and we have the following allergens present in our warehouse: Gluten, Mustard Seeds, Nuts, Peanuts, Sesame Seeds and products preserved with Sulphur Dioxide. All allergens are stored in designated areas and cross-contamination is excluded when a product has been resaled in orginial packing.

Occasionnaly we are packing ingredients in smaller size which is documented in our records and in all specification.

In order to avoid cross contamination we are using since July 2015 strict colour code system in our packing area (utensils, scoops, mixing containers etc.):

Gluten = BLUE
Mustard Seeds = YELLOW
Nuts (also peanuts) = RED
Sezame Seeds = GREEN
No allergens = WHITE

Labels on repacked items contain allergen info. Staff working in packing area are trained. Holding ISO 22000:2018 certification, the proper dealing with allergens and possible cross contamination are part of our Company objectives.

Please contact me if you have more question,

A handwritten signature in blue ink, appearing to read 'Istvan J. Meszaros'.
